

First formed in Calgary, Alberta in 1974, the club was formally organized in 1975 and incorporated in 1981 as the Cantrak Society of Model Railroaders. It was reorganized in 2014 as the Calgary N-Scale Traksters Society.

We are a group of model railroaders who share a common interest in and passion for 1:160 N-scale modelling.

Our mission is “making N-scale modular railroading fun”.

Members may build or purchase a 2' by 4' module based on a modified standard of the one defined by the NTRAK Modular Railroading Society. Standard track spacing allows member and club modules to be connected to form larger layouts of various shapes and sizes which we build for a number of shows and events every year.

We generally meet twice a month in members' homes where we do project and layout planning, module and model construction, model train operation and socializing. We also hold a number of learn-to-do clinics, layout tours and family fun events annually such as a summer BBQ and Christmas dinner/party.

New members and families are welcome!
If you are interested in learning more or sharing what you already know about model railroading in general or specifically N-scale, please email the club at

cantrakinfo@gmail.com.
